HTML Practical Questions

1. Lists

1. Create a **nested ordered list** that displays:
    - Programming Languages
        1. Web
            - HTML
            - CSS
            - JavaScript
        2. Backend
            - PHP
            - Java
            - Python
2. Create an **unordered list** of your daily tasks at university

    Use **different list-style types** for each level: (Morning, Afternoon, Evening, and Night.)

    - `disc`
    - `circle`
    - `square`
    - `none`

---

2. Description List

3. Create a **description list** for Computer Components with the following:
    - CPU → Central Processing Unit
    - RAM → Random Access Memory
    - HDD → Hard Disk Drive

---

3. Tables

4. Design a table showing **Student Results** with the following columns:
    - Student ID
    - Name
    - Subject
    - Marks
    - Grade

    Apply **rowspan** for the same student across multiple subjects.(table provided below)

---

4. Images

5. Insert an image of your choice with:(sample.jpg)
    - Alternative text
    - Width = 300px, Height = 200px

---

5. Figure

6. Insert an image inside a `<figure>` with a **caption** below it.(figure.jpg)

---

6. Hyperlinks

7. Create a **navigation menu** with links to "Home" and "About".
    - Use `href` with dummy pages (`home.html`, `about.html`, etc.).

---

7. Bookmarks

8. On the **same HTML page**, create a **Table of Contents** using **bookmarks**.

    - The Table of Contents should **link to the topics already done**:

        - Lists
        - Description List
        - Table
        - Images
        - Figures
        - Hyperlinks

    - Also include **links to the upcoming tasks** that they will do next on the same page:

        - Image Links
        - Mail-to Links
        - Image Map

    - **Display the Table of Contents in a table format** (each row corresponds to one topic).

---

8. Image Links

9. Insert a company **logo image** that links to the company's official website when clicked.(company.png)

---

9. Mailto

10. Create a link that opens the user's default email client with:

- To: `support@example.com`
- Subject: "Website Inquiry"
- Body: "Hello, I would like to know more about your services."

---

10. Image Map

11. Use the following sample image:

Create an **image map** with at least **three clickable areas**:

- A **circle** area (e.g., top left part of image) linking to `circle.html`.
- A **rectangle** area linking to `rectangle.html`.
- A **polygon** area linking to `polygon.html`.

Instructions for Supporting Pages

When you create links in the main exercise (navigation, image map, etc.), the following pages should also be created:

---

1. `home.html`

- Title: `Home Page`
- Heading: "Welcome to Home Page"
- Create a heading using `<h1>` tags.
- Use the `<marquee>` tag to make your heading or text scroll across the screen.

---

2. `about.html`

- Title: `About Page`
- Heading: "About Us"
- One short paragraph about your favorite topic (2–3 sentences).

---

3. `circle.html`

- Title: `Circle Area`
- Heading: "You clicked the Circle!"
- Insert a following image

---

4. `rectangle.html`

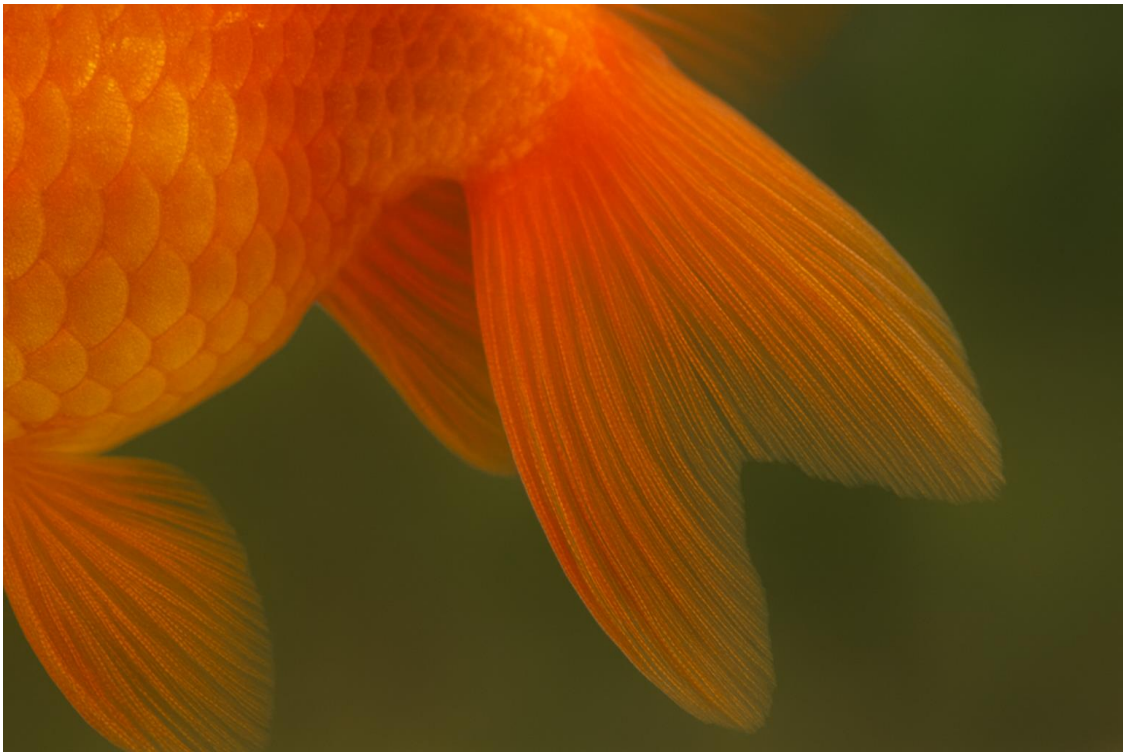

- Title: `Rectangle Area`
- Heading: "You clicked the Rectangle!"
- Insert following image

---

5. `polygon.html`

- Title: `Polygon Area`
- Heading: "You clicked the Polygon!"
- Insert following image

Student ID	Name	Subject	Marks	Grade
101	Ali Khan	Mathematics	85	A
		English	78	B+
		Science	92	A+
102	Sara Lee	Mathematics	88	A
		English	82	A-
103	John Doe	Science	75	B
		History	80	B+
		English	70	C+
